

Two Estill football players sign letters to play for Campbellsville

Two 2020-21 Estill County Football Engineers have signed their letters of intent to play football on the college level at Campbellsville University. Dyllon Long, a senior tight end and defensive end for Estill County, and Coben Clem, an outstanding senior wide receiver for the Engineers have signed their letters of intent to play football for the Campbellsville University Fighting Tigers.

"I am excited that Coben has signed with Campbellsville to play football," said Estill Engineers football coach Jordan Marcum. "Coben has been an exciting player for us since I have been here. He has made some unbelievable plays for us on the offensive and defensive side of the ball. He has a good combination

of speed and quickness that will be perfect at the next level. Coben has always played like he has something to prove and he continues to prove it time and again. We are so proud of Coben with what he has accomplished here and will accomplish at the next level."

Coben is the son of Amy Clem and John Clem and is a third generation Estill County Engineers football player as both his father, John, and his grandfather, Lonnie Clem, played for the Engineers.

Coach Marcum has similar good things to say about Dyllon, "I am excited that Dyllon signed with Campbellsville to play football. From the first time I met Dyllon I knew he could play college football. His size, quickness and God given abilities fit foot-

ball perfectly. It took sometime to get to Dyllon to play football but once he was in he loved it. There is nothing wrong with playing multiple sports because sometimes it's the sport you least expect that will give you the most you could ever want, like a scholarship to pay for school. Congratulations Dyllon, we are all really proud of you!"

Dyllon just completed another successful season playing for the Estill County Engineers basketball team. He is the son of Wendi and Brandon Long.

Campbellsville University competes in the the Mid-South Conference and finished 1-4 in a shortened spring season because of Covid. Their head coach is Perry Thomas.
