Bug Proof Your House This Fall

the seal within. These guns are available for less than \$10.

To reduce the entry of lady beetles, cluster flies and other overwintering pests, repair gaps and tears in window and door screens. Keep windows closed when adults are emerging to prevent entry. Repairing screens also will keep out flies, gnats, mosquitoes and midges next summer.

Another way to prevent pest entry is to apply an exterior barrier treatment with insecticides. To gain the most from this effort, apply long-lasting liquid formulations that contain synthetic pyrethroids. These products are available at some hardware, lawn and garden

shops.

If you apply the barrier treatment, use a compressed air or hose-end sprayer to treat the base of all exterior doors, garage, crawl space entrances, foundation vents, utility openings and beneath siding. It's also useful to treat the outside perimeter of the foundation with a two- to six-foot wide band along the ground and two to three feet up the foundation wall.

If you prefer not to tackle these pest-proofing activities, contact a professional pest control firm. Many firms are beginning to offer pest-proofing services.

HERE IS A PLEASANT LITTLE GAME that will give you a message every day. It's a numerical puzzle designed to spell out your fortune. Count the letters in your first name. If the number of letters is 6 or more, subtract 4. If the number is less than 6, add 3. The result is your key number. Start at the upper left-hand corner and check one of your key numbers, left to right. Then read the message the letters under the checked figures give you.
